

CHRISTIAN RAMOS

Freelance Software Developer | Security-Focused Automation | Business Operations Tools

Hayward, CA | 510-456-5036 | cramos5203@gmail.com | linkedin.com/in/christian-ramos23 | ramosops.com

TECHNICAL PROFILE

Recent B.S. Computer Science graduate with a cybersecurity concentration and hands-on experience building practical automation, tracking, outreach, and operations workflows for teams. Focused on lightweight business software, secure process design, internal tools, data-quality workflows, and security-aware automation that reduces manual work without adding avoidable technical complexity.

FREELANCE CAPABILITY AREAS

Secure Automation	Internal Business Tools	Software Security Support
- Airtable workflows - Google Sheets/Gmail automations - Webhook-driven status tracking - Email and CRM outreach systems	- Lightweight dashboards - Operational trackers - QR/inventory concepts - Append-only record systems - Simple LAN-hosted tools	- Security-conscious requirements - Access-control thinking - Audit logging concepts - Network health monitoring - PII-aware workflow design

TECHNICAL SKILLS

Programming & Scripting

Python, C/C++, PowerShell basics, JavaScript basics, HTML/CSS, structured problem solving, debugging

Automation & Data Tools

Airtable, Google Sheets, Gmail, HTML email templates, Slack alert workflows, PayPal integration concepts, CSV/JSON files, Microsoft Excel

Security & Systems

Cybersecurity fundamentals, OPSEC, network monitoring concepts, access-control design, audit trails, secure data handling

Developer Workflow

Git/GitHub, GitHub Pages, Cloudflare Pages, Cloudflare DNS, Cloudflare D1, Linux, terminal tooling, lightweight web UI concepts, documentation

SELECTED TECHNICAL PROJECTS & BUILD EXPERIENCE

Business CRM & Email Outreach Automation | Google Sheets, Gmail, HTML templates, automation workflows

- Built CRM-style outreach tooling to add contacts, organize campaign data, and send mass email campaigns from structured templates.
- Designed workflows around business usability: repeatable inputs, clear contact records, reusable messaging, and reduced manual follow-up.

Airtable Operations Automations | Airtable, conditional triggers, workflow tracking

- Created automations for participant/session operations, including status-driven actions, checkbox-triggered email workflows, and operational trackers.
- Used structured fields and process rules to reduce repetitive administrative work and improve visibility into operational status.

RamosOps Freelance Consulting Platform | Cloudflare DNS, GitHub Pages, custom domain strategy

- Established RamosOps as a freelance brand for automation, cybersecurity consulting, and practical software for business functions.
- Configured domain strategy around a professional portfolio site that can present services, case studies, technical projects, and client contact paths.

Network Health Monitoring Tool Concept | Python, terminal dashboard, local logs, lightweight LAN UI design

- Designed a simple security/audit visibility tool to monitor uptime, connected devices, new-device events, gateway/DNS health, and bandwidth indicators.
- Prioritized local operation, clear credentials, terminal-first visibility, CSV/JSON logs, and minimal architecture to avoid unnecessary infrastructure overhead.

Secure Payment Form & Append-Only Records System | PayPal, Cloudflare Pages, Cloudflare D1, API design

- Built a full-stack secure payment form using PayPal checkout integration, Cloudflare Pages hosting, and Cloudflare D1 storage for business payment records.
- Applied append-only record rules with controlled payment-status updates for webhook/state changes, preserving traceability and safer business-record handling.

PROFESSIONAL EXPERIENCE

Data Collection Technician | Tacit

Jan 2026 - Present

San Francisco Bay Area

- Support structured data collection operations in prototype-focused workflows, keeping sessions organized and aligned with project requirements.
- Maintain tracking systems and operational records using Airtable and data-analysis practices to improve visibility into participant and workflow status.
- Identify process gaps, reduce workflow friction, and help keep repeatable procedures consistent across sessions.

Mathematics Grader | California State University - East Bay

Jan 2024 - Jan 2026

Hayward, CA

- Evaluated Pre-Calculus, Calculus I, and Calculus II coursework with accuracy, consistency, and departmental compliance.
- Identified recurring error patterns and created solution guides that translated complex technical concepts into clear documentation.
- Provided tutoring support that strengthened analytical reasoning, problem decomposition, and communication of technical material.

Student Assistant - Legal Department | California Department of Industrial Relations

Feb 2024 - Apr 2024

Oakland, CA

- Managed case files, legal documents, ADA database records, data entry, updates, and accuracy checks in a compliance-driven environment.
- Organized evidence packets, document requests, routing, filing, and deadline tracking while handling sensitive records professionally.

LEADERSHIP & TECHNICAL COMMUNITY

Communications Officer | Pioneer Branch of IEEE

Aug 2024 - May 2025

Hayward, CA

- Managed communication systems across email, social media, Discord, and campus platforms for workshops, tech talks, and professional events.
- Coordinated with executives, faculty, guest speakers, and industry professionals while refining outreach through engagement metrics.

Marketing Lead | HackHayward

Jun 2024 - Dec 2024

Hayward, CA

- Led student marketing operations for the university hackathon, including campaign timelines, sponsor/speaker outreach, and event awareness.
- Drafted external communications and supported fundraising, mentor, judge, and sponsor coordination for a technical student event.

Delta Chi Fraternity Alumni | Former Intramural Chair & Associate Member Counselor - leadership, mentorship, member coordination, and event organization

FREELANCE DELIVERY APPROACH

Discover	Clarify the business process, users, data sources, risks, and success criteria before implementation begins.
Build Lean	Create practical tools using the smallest reliable architecture: scripts, dashboards, Airtable/Sheets automations, or lightweight web UI.
Secure by Default	Consider access, status-change rules, data sensitivity, audit trails, and failure cases early rather than retrofitting security after deployment.
Document & Handoff	Provide clear setup notes, usage instructions, workflow diagrams, and maintenance guidance for long-term use.

ADDITIONAL OPERATIONS EXPERIENCE

Operations Supervisor | CVS Pharmacy - supervised staff, enforced procedures, handled cash balancing, supported vendors, and provided operational guidance.

Intern | Hayward Chamber of Commerce - supported meetings, document organization, event planning, social media coordination, and Microsoft Office-based data entry.

EDUCATION & CERTIFICATIONS

California State University - East Bay | B.S. Computer Science, Cybersecurity Concentration

May 2026

Certifications: Technical Support Fundamentals | Introduction to Cybersecurity Foundations | OPSEC Awareness for Military Members, DOD Employees, and Contractors
